

“Evers: building since 1918.”

Marlborough Road, Chelmsford

An exclusive high quality development of 10 number 3 storey town houses in Chelmsford town centre completed as a Design and Build project for Asprey Homes.

With its carefully selected materials which included: natural stone slate roofs, stone parapets and features, purpose made joinery and a mixture of yellow stock facing bricks and Ashlar render to facades the new terrace made for a very appealing redevelopment of an industrial plot in a residential area.

Fully fitted out internally to a high standard with good quality sanitary ware, porcelain and stone ceramic tiling, oak kitchens, limestone floors and chrome fittings these properties provide contemporary living spaces. Further attention to detailing included natural stone fire surrounds, balconies and landscaped gardens.

Following the success of this project we negotiated a further two projects to be completed in partnership with the client.
