Pipers and Bechers, Galleywood

Pipers and Bechers is a small select development of 7 number 4 and 5 bedroom, 2 and 3 storey properties for sale with internal floor areas ranging from 1800 - 2000 sq ft. The site is serviced by an adoptable road and the houses have a mixture of attached and detached garages and carports.

The development is built on a large plot of land following demolition of an existing house, excavating and filling of the surrounding ponds and ditches necessitating the construction of deep strip foundations to the new buildings. The project was further complicated by the requirement for surface water storage and attenuation to an adjacent waterway all to the approval of the Local Authority.

The houses are of traditional cavity wall construction, under tiled or slated roofs with a mixture of facing brickwork and Monocouche render elevations.

All properties were completed with a high standard of finishes including bespoke fully fitted kitchens, marble and stone floors, fully tiled en-suite bathrooms and shower rooms fitted with high quality sanitary ware.
