

About the Company

Established in 1918 Evers is a privately owned family company working throughout East Anglia and the North East London Boroughs in both the public and private sectors.

As a principal contractor with an annual turnover in excess of £17m, Evers undertake major

works projects together with smaller projects with their specialist works division.

Evers is a highly respected multi disciplined professional organisation providing attention to detail and quality buildings tailored to individual client's requirements.

Procurement routes are generally through competitive tendering or negotiation on all types of contract including partnering or framework agreements.

Our Team

We directly employ over 100 people and recognise the important contribution our team plays in providing a successful organisation for our clients.

Our senior management team and support staff take active roles in current projects to ensure their smooth and successful delivery. They additionally ensure vital communications are maintained being accessible to clients, consultants, sub-contractors and suppliers.

We recognise the importance of training and continued development and operate a structured training plan to deal with the requirements of a multifaceted business and industry.

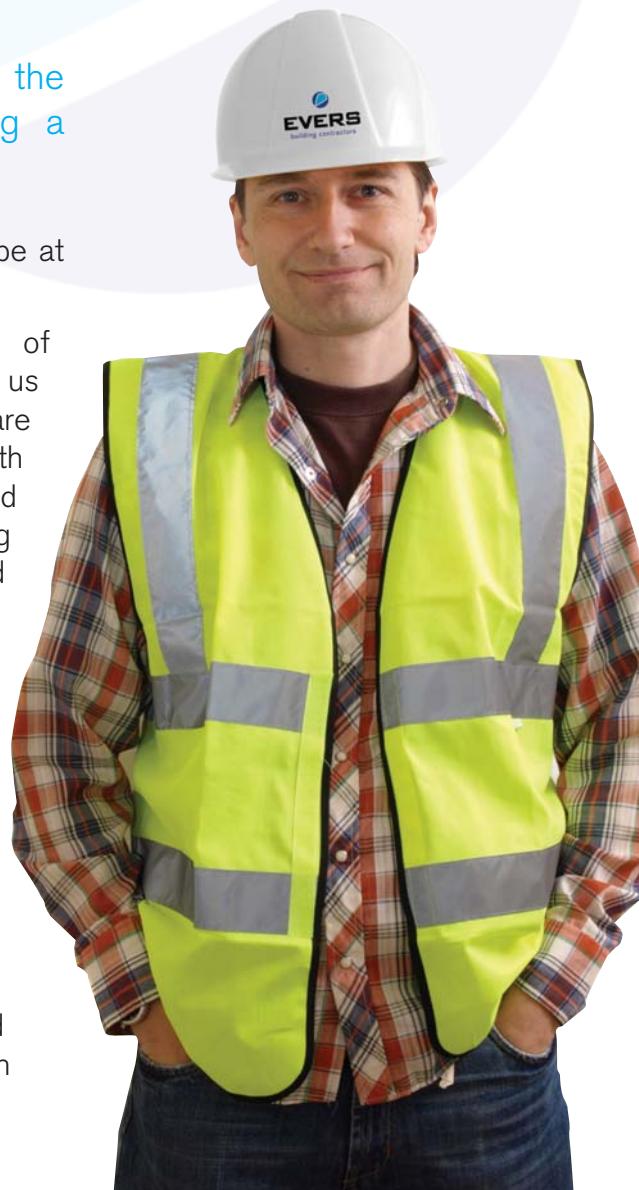

Our training plan is registered with Construction Skills and externally audited to ensure the continued development of all our employees. We also encourage and support our staff to achieve professional qualifications to

enable their knowledge to be at the forefront of the industry.

Health and safety is of paramount importance to us which ensures buildings are delivered in accordance with all the industry regulations and with regard to the wellbeing of all our operatives and third parties.

Through working closely with clients and designers we actively seek to reduce potential health and safety risks.

Environmentally we are committed to minimising the impact of our operations through the adoption of sustainable practices and continuous improvement in environmental procedures.

"Evers is an established principal building contractor working in both the public and private sectors"

Education

We have worked consistently for many years in schools and colleges in Essex, Suffolk, Hertfordshire, Cambridgeshire and outer London and have considerable experience in all aspects of the education sector.

The company has been involved in school projects since the 1940's constructing a vast number of new build schools and extensions across the region. Our extensive range of experience in this sector enables us to understand and appreciate our clients' requirements, particularly assisting in ensuring the smooth running of working in an occupied environment.

Completed school projects include sports halls, classroom blocks, technology centres and the latest generation of artificial football pitches.

Project: Comberton College, Lecture theatre

Comberton College

"We pride ourselves in operating a comprehensive cost analysis service, efficient estimating service, and a professional management team."

Southend High School for Girls and Chase High School

Contracts included the construction of a technology block, a sports hall, a learning centre and an Arts facility.

Architect: Living Architects

Client: Southend Borough Council

Healthcare

Our experience is accomplished within this more specialised sector, having worked with general practitioner partnerships and regional healthcare trusts.

Completed projects include the provision of urban and rural general practice surgeries, multi bed wards, consulting rooms and specialist units together with refurbishment of existing facilities.

Our understanding of complex and critical specifications in healthcare environments is of substantial benefit in delivering clients' requirements.

Project: Papworth RSSC

Architect: Frank Shaw Associates
Client: Papworth Hospital NHS Trust

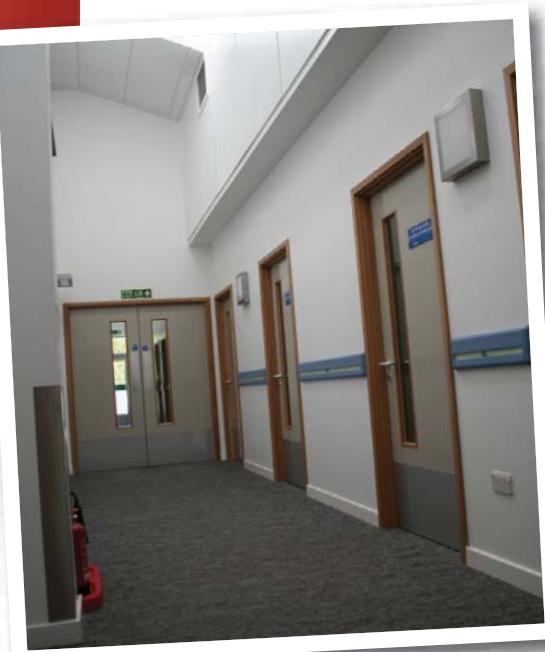

Project: Papworth Diagnostic

Architect: AD Architects
Client: Papworth Hospital NHS Trust

Papworth Hospital

The confined site at Papworth dictated the need for careful planning and co-ordination in diverting existing services around the site with minimum disruption.

The construction of the Diagnostic unit involved the installation of CT and MRI scanners with digital x-ray facilities. The diagnostic equipment required specialised shielding which formed part of the construction process.

"Our extensive range of experience in this sector enables us to understand and appreciate clients' requirements."

Public Buildings

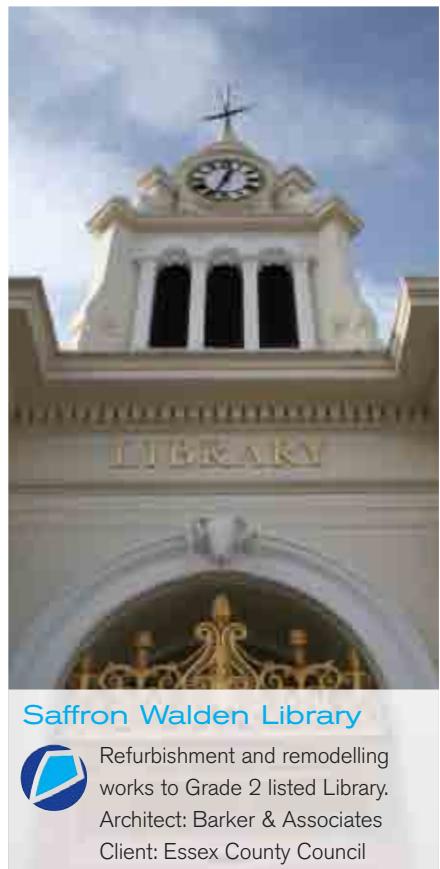

We pride ourselves on our contribution to the provision of public buildings throughout East Anglia.

The company has been involved with new build projects and the refurbishment of existing public buildings for both local and government authorities. Examples of which include; libraries, museums, council offices, care homes, village halls and youth centres.

We additionally have a wide range of experience in working on historical and listed buildings.

New church, Presbytery and Church Hall.
Architect: Barker & Associates

Galleywood

Design and build development of 7 executive houses.
Architect: Arcady

Housing

Working for many years with a number of local authorities and social housing providers we have developed numerous sites from 1 or 2 units up to 50 plus homes.

We can offer turnkey packages for housing projects delivering single and multi-storey units with associated infrastructure works. Our experience of design and build, through work with local architects and engineers enables us to develop projects from outline planning through to completion.

We have experience in various types of house construction and have worked for RSL's, Local Authorities and speculative developers.

The ever changing needs of the market can be met by our team who are familiar with Eco-homes, Code for Sustainable Buildings, Considerate Contractors, Secure by Design and Local Authority agreements.

Project: Newbiggen Street, Thaxted
